SUMMARY

Passionate Software Engineer, with 19 years of experience in building commercial projects, complex business-level applications, mobile applications and back-end systems. Primary focus on Typescript/Javascript, Node.js, Vue, PHP and C#.

I am what you call an end-to-end developer, well-rounded in most of the software development lifecycle, and particularly passionate about backend, API and mobile application development.

Over the years, I have had the privilege of working with clients from various business sectors, including education, government, B2B, hospitality, medicine, research and more.

I enjoy continuous learning, and embracing new techniques and technologies to turn creative ideas into reality.
